

INTRODUCTION TO ASSET MANAGEMENT AND ISO55000 (1 DAY)

UNDERSTAND HOW **CORE ASSET MANAGEMENT CONCEPTS** LIKE RISK-BASED PORTFOLIO OPTIMIZATION CAN BENEFIT YOUR ORGANISATION

Strategic asset management has been increasingly recognized as the key to improved investment and maintenance decision making across all asset-intensive sectors (e.g. Oil & Gas, Aerospace, Manufacturing, Public Transport and Electricity and Water Production & Distribution). Asset management is no longer just the domain of technicians, operators and engineers. It is an integral part of the business organization. Increasingly, businesses need to manage rapidly changing stakeholder interests. Asset management gives answers to the questions; why and for whom do we do the things we do? What external and internal stakeholders play a role? How do we get better control, and show that we are in control? How do we link the strategic objectives with practice?

The *one-day* basic Asset Management training provides you an *overview* of state-of-the-art *Strategic Asset Management* based on classroom lectures, which will be interspersed with exercises and interactive sessions.

BENEFITS:

After participation in the training you will

- Understand the concepts and practices of Strategic Asset Management
- Understand the main ISO 55000 requirements
- Have knowledge of the asset management processes

Training Program

- General introduction and history of Asset Management
- The main Asset management concepts, e.g.
 - operating model for clear decision-making
 - risk management for proactive and holistic business management
 - line of sight (AM Strategies – AM Plans – Portfolios) etc.
- ISO 55000 fundamentals and requirements

For whom?

This training is designed for professionals working in asset intensive organisations, large industries or government organisations. The training is specifically designed for professionals wanting to understand the latest asset management concepts, processes and possibilities; asset owners, asset managers, technical and maintenance managers or anyone working with managing and maintaining assets.
